

Jimmy Sharma – Head of Investment Banking and Capital Markets Technology department at Morgan Stanley

BIOGRAPHY

Jimmy Sharma is the Head of Investment Banking and Capital Markets Technology department at Morgan Stanley with responsibility for technology strategy, developing solutions, and advising internal and external clients. Since joining the firm in 2005, he has worked across multiple business units on a number of key initiatives including building a suite of datamining and analytics applications, security and access control solutions, various custom CRM implementations and a front to back renovation of the client and transaction management systems that underpin the investment banking business.

Prior to Morgan Stanley, Jimmy freelanced as a developer at several wall street firms, and computer labs. He also ran a not so successful startup. He holds a Masters in Computer Science and lives in New Jersey with his wife and two children.

Jimmy is also a passionate adventure motorcyclist.
