

Niki Quarmyne

Fintech Business Development – Morgan Stanley

- Niki is an Executive Director within the Fintech Business Development Team at Morgan Stanley. Within Fintech business development, her team identifies transformative and disruptive technologies impacting Morgan Stanley's businesses and works across the organization as well as partners with venture capital firms to identify start ups and big techs to partner with or invest in. She is also a member of the Black Employee Network Steering Committee.
 - Prior to joining Morgan Stanley, Niki spent over a decade at Goldman Sachs where she held various strategic leadership roles within the Global Markets Division including the development of a Fixed Income, Currencies and Commodities Systematic Market Making business. She started her career at Goldman Sachs, developing technology strategy for real estate projects.
 - Niki joined Goldman Sachs in New York in 2007, relocated to Hong Kong in 2011 and moved back to New York in 2015. Prior to her career in the financial services industry, Niki was a product development engineer at Cummins Engines, where she developed electronic control modules for multinational organizations.
 - Niki has an MBA from the Global EMBA program at Columbia University, London Business School, and the University of Hong Kong; a Master's in Electrical Engineering from the University of Pennsylvania and a Bachelor's in Electrical Engineering from Christian Brothers University.
